'Eggsplotation': The infertility industry has a dirty ...

A woman has become a walking ovary." Eggsplotation highlights the stories of several women who experienced severe complications from donating their eggs, and who also had long term health problems that they believe are related to their donation. Additionally, the film tells of one woman who died from a condition that was a direct result of taking the hormone drugs, and another who was healthy, but then died from colon cancer at the age of 34 after donating her eggs three times.
