The long division method is used when you are dividing a large number (usually three digits or more) by a two digit (or more) number. It is set out in a similar way to short division (the 'bus stop' method) .

The Grid Method for Long Division Shelley Gray

The Grid Method is intended for those who plan to teach traditional long division. It follows the same steps as traditional long division, but uses a different method of organization. This makes traditional long division easier for some students.

The Best Formal Long Division Method For KS2 [Long ...

But Wait....That Long Division Method Looks Too Hard For My Ks2 I Hear You Shout! I admit, when I first started teaching Year 6, I shied away from the long division method for a long time. I'd never understood it properly, yet always considered myself a competent mathematician, so didn't really understand the need for it.

Long Division mathsisfun

Below is the process written out in full. $4 \div 0 = 4$ Now we subtract the bottom number from the top number. Bring down the next digit of the dividend. $42 \div 25 = 1$ remainder 17 Divide this number by the divisor. The whole number result is placed at the top. Any remainders are ignored at this point
