Manual Therapy In Children is an excellent resource for any chiropractor, whether they have a pediatric practice or not. Using both solid research and common sense anatomical rationale to build the case for spinal care, it clearly explains the absolute need for children and pregnant women to have their spines checked. Being written by medical doctors could be a point of contention for some chiropractors, but the authors seem to keep objective and unbiased.

MANUAL THERAPY IN CHILDREN: PROPOSALS FOR AN ETIOLOGIC MODEL

Manual therapy in children (MTC) is receiving greater attention. Several monographs and reviews deal with this subject [1-4]. Although these publications cover the field from the viewpoint of a classic pediatric approach, discussing which diagnoses of pediatric medicine might be successfully treated by MTC, they do not furnish an independent concept for the functional disorders that we see in these children.
