Lymphoma: Johns Hopkins Pediatric Oncology

Lymphomas (Hodgkin and non Hodgkin lymphoma) are the third most common cancer in children, and NHL accounts for approximately 6 7% of cancers in children. Lymphomas are a group of malignancies in which the cancer cells originate from the lymphoid system.

Pediatric Lymphomas and Histiocytic Disorders of Childhood

Historically, the pediatric oncology community has not fully embraced LCH, likely because of the unresolved biological ambiguity of LCH as a malignancy versus inflammatory disorder. More recently, identification of recurrent somatic mutations in BRAF V600E in hematopoietic precursor cells more clearly define LCH as a true myeloid neoplasia. Epidemiology . The incidence of LCH is approximately ...
